

GFORCE[®]

FOR PONDS UP TO 3,000 GALLONS

Bio-Mechanical Filtration

- Combines both Biological and Mechanical Filtration in one compact package
- Power assisted backwash engineered for use with low pressure high flow pumps
- Uses less water to backwash than conventional filters
- Designed for high flow rates, extreme fish loads, and elevated feed rates
- Just minutes to clean

Tubular bio-media offers the highest surface area for growth of beneficial bacteria, engineered to prevent channeling and clumping. Ridges protect biofilm in backwash mode.

PATENT#: US 7,329,350
